Health Activities 2018-19

Malnutrition

Malnutrition needs no introduction. More than 38% of the children under the age of 5 in the area that we serve are malnourished stunting their physical and mental growth. We have embarked upon a project to implement long term sustainable methods for mitigating malnutrition covering 25 villages consisting of over 1369 malnourished children through the medium of Homoeopathic care.

The project commenced in October 2015 in the territory of Kurunze Primary Health Center with screening of 4600 children from 72 Aanganwadis. Out of this 542 Case definition was prepared for each child by recording the basic parameters of malnourishment as well as other family conditions. Based on that a treatment plan with Homoeopathic medication was defined for each child. Regular monitoring and follow up is being done monthly. Mothers were counselled regarding ways for feeding & caring for their children. Regular Check-up and follow up has begun showing significant improvement in the health of malnourished children.

Support:

Rotary Club of Palghar supplied Mama sure powder (nutritional supplements) to 200 pregnant ladies. During pregnancy a lot of improvement in their overall health and weight gain was noted. This has resulted in safer delivery & healthier mother & child. A average birth weight of newborn is noted 2.800kg.

Health Awareness Meetings:

Health awareness is the most critical component of health care. To spread awareness on illnesses, medications, hospital facilities, precautions to be taken during various health issues, 131 village meetings were organised. Topics covered during these meeting were: Homoeopathic Medicines and its effectiveness, Importance of 1000 days for mother & after delivery for child health. Good nutrition to the mother during pregnancy, risk factor during pregnancy, importance of institutional Delivery, Malnourishment, Anemia among others. Tuberculosis & Leprosy, Total 1923 males & females & their family members were "educated" during these meetings.

Regular ANC & PNC Care through MHU & Distribution of Supplementary Medicine for Needy Patients

Anemia Detection in Adolescence Girls.

In this Project we select 4 Schools. We prick sample of 592 girls from 8th to 10th std. Those girls who have their Hb below 10.0mg, we provide them Iron supplement for 3 months. After three months again we prick all

this girls. The result shows big improvement.

Name of School	Total Girls	% of Anaemia Pre Intervention	% of Anaemia Post Intervention
Kev School	129	34.11%	8.53%

Educational Activities 2018-19

MLDT's educational programme for holistic development of school children is executed with the support from Each One Teach One Charitable Foundation. The objective of this Programme is to provide quality education in formal and informal ways to prepare tribal students for their better future. The extra coaching sessions for S.S.C students has been very successful for giving them a confidence for further studies. The overall scores of individual students and thereby passing percentage of schools is increasing year by year. Good score in S.S.C exam opens the doors of the reputed colleges for these underprivileged boys and girls. Girls have started attending colleges which has resulted in decrease in the rate of early marriages.

As a part of life education, we have started with 'Jigyasa' programme for adolescents wherein Sex Education, career planning, managing trouble teens, depression etc knowledge is being provided. In the course, they learn to identify such problems and skills of managing them efficiently. The programme has helped many in planning the career options such as B.Ed., D.ED, ITI Diploma, Nursing, B.A., M. A. among other.

Learning cannot take place inside a room, one need to go out and experience things to understand them better. By this principle, 10th grade students are taken for field visit, picnic at various places. This year total 600 students were taken to Mumbai- Gateway of India & Nehru Science Centre. Students who were seeing Mumbai for the first time; their faces were shining bright with pure joy and amusement! In addition to this, sports competition, cultural programmers are organized to encourage students to express their hidden talent. Uniforms, notebooks are distributed to motivate them to come to school regularly.

Computer Literacy / Internet

– (Supported by REAL .USA)

The 21st century is a competition era and in this era of competition the technique of information technology can survive. The present era is a computer era but in this rural educational Development still do not have access to computer education to introduce this competition to the students in rural areas by making them aware of the competition in order to achieve this, this program was implemented with 1257 children in 12 schools in this year. In this the children gave basic information about computer and Word excel and power point with the help of the internet they can be able to identify the world. On internet they can be able to identify the world on internet basic they will be able to find the information in their studies they will be able to find their future in future.

English Improvement Program

(Supported by REAL.USA)

Vikramgarh is a taluka of 90% tribal population in Palghar district. People face many difficulties and quality education is a big problem. There are a large number of ZP schools but for higher education children have to walk 3 to 4 km. Due to the large number of students and shortage of teachers, the children are lagging behind in areas like English. This problem was noticed by M.L. Dhawale activist survey and thus prepared a good Basic English reading course and applies it to every school (7) and followed up with the result as well.

Organic Farming 2018-19

Sustainable Organic Farming at Bhopoli 2018-19

Broad goal

The broad goal of this project is to make farming on small land plots ecologically sustainable and economically viable and meet food security and balanced nutrition needs of the family along with incomes for enhancing quality of life.

Target Group

We worked with 70 tribal resource deprived farmers drawn from 8 villages. Our intent is these farmers will practice sustainable farming and enhance their quality of life thereby becoming role models to promote sustainable farming in their respective villages.

Interventions

- 1. Provision of needed farm implements** – MLDT provided farm implements and resources required for farming – drums, spray pumps, paddy threshing machine, motor for pumping etc to selected farmers within group
- 2. Capacity building** – Farmers were trained in paddy cultivation process by visit to BAIF, Jawhar and organic farming team through farm demos. Soil improvement through on field demos of composting, vermi-compost beds, preparation of organic bio pesticides, disease and pest control were the prime areas. Soil testing was done for 6 farmers.

3. **Irrigation** – Two bore wells and 4 dug pits formed part of irrigation support this year enabling these farmers to cultivate round the year.
4. **Paddy Cultivation** – Farmers implemented both processes System of Rice Intensification and the traditional method. Farmers who used appropriate quality of inputs and adhered to practices got better results. Prime challenges are unpredictable climatic conditions, inadequate organic inputs and strict adherence to process. Though 55% of plots under observation produced yields of over 35KG/guntha or 1400 kgs/acre which is 70 – 80% of taluka average. The challenge is to produce consistent results covering their entire field.
5. **Vegetable Cultivation & Marketing** – This constitutes the prime ‘farm linked livelihood activity’ for farmers who cultivate round the year. The results are as below:

Season	Number of farmers	Quantity supplied in Kgs	Value realized Rs.	Average Farmer return per season in Rs.
Kharip 2017	46	5243	120589	2621
Kharip 2018	7	1136	43168	6166
Winter 2018	38	22308	669240	17611
Winter 2019	24	10441	592096	24670

1. Farmers were able to supply vegetable for whole year. We supported one vendor weekly once in May, June, July also.
2. Due to lesser rate last year, many farmers didn’t grow vegetables, still with 25 active farmers we were able to achieve 38rs/kg rate as compared to 23rs/kg last year. Though we could not sell complete produce by each farmer but farmer’s average earning is increased compared to last year.
3. Farmers could achieve this due to transport facility provided by ‘Green earth logistics’, considerable hand holding ‘MOFCA’ team volunteers, and constant monitoring of marketing plan by MLDT team.
4. It was not just rate, but this year for the first time, farmers went to market and sold their vegetables. Started with two farmers initially but by the end of the season, almost all the active farmers visited Mumbai bazaar, got trained to sell their vegetables, could speak to customers, explain the process of organic farming, benefits of local-seasonal-organic field produce.

5. Farmers could employ a driver for three months with monthly salary of 8000/-. Also those who used to go with tempo got labour charges 300/-+lunch 100/-, total 400/- per visit. Some of the farmers earned more than 3000 per month other than vegetables with this support of Mumbai market.
6. Farmers reached Taddeo school, Godrej-vikroli, Rustomaji-Goregav, Vasant garden-Mulund, with their vegetables.
7. There are two vendors one from Vashi, another from Thane, newly added this year, who are taking vegetables in bulk.
8. Due to less rain fall this year, water level is reduced and so the vegetable supply has got reduced.

Our Partners

We have been ably supported by:

- People for Progress in India (PPI) – a USA based NGO which has funded us for past 5 years towards Sustainable Farming as well as Tree Plantation project.
- Mumbai Organic farmers & Consumers Association (MOFCA) – Mumbai based group has helped us getting marketing place in Mumbai and volunteers to support and train farmers.
- Global Greengrants Fund (GGF) – has supported us for human power to monitor the program, for capacity building and supplementary income generating avenues.
- Green Earth Logistics - Mumbai based company has donated a Tempo to transport vegetables.

Priorities Ahead

- Create robust demo cum training plots on at least 8 – 10 farmer fields
- Strengthen farmer group and leadership within them
- Establish peer guaranteed system (PGS) for organic certification of produce Identify multiple markets / buyers to cater complete farm produce by the farmers.

VIDYA MANDIR HIGH SCHOOL- BALODYAN SECTION: REPORT OF SCREENING

Dr. M.L. Dhawale Trust has been conducting the health screenings in Balodyan for the past five years.

The screening activity in the Pre-Primary section was carried out with the objective of assessing the overall physical growth of the child. It would be necessary to further evaluate few of these children specifically for certain health related issues and/or nutritional deficiencies. The screening also focused on understanding the academic/behavioural difficulties faced by few of these children. The latter, too needs further evaluation.

PUNE BRANCH ACTIVITIES 2018-19

- **June 2018:** New batch of students joined the institute. The batch comprises of one part timer and one full timer. The part timer came from city of Aurangabad and full timer came from the remote area Gondhia, Vidharbh.
- **September 2018:** Started **INTERN'S ORIENTATION PROGRAMME** with a objective of introducing the ICR methodology in the interns of various colleges around Pune. The first batch of 3 students joined in September 2018, 2 students from Dhondumama Sathe Homoeopathic College and 1 student from D.Y.Patil College joined the programme. The second batch of 2 students joined in January 2019, from Bharati Vidyapeeth Homoeopathic Medical College. We also conduct a session on Friday for interns which is attended by interns from Bharati Vidyapeeth (10 interns), D.Y.Patil (2interns). The Pune team has had a very good experience in conducting this programme it helped to train various guides in Pune team.
- **1st to 3rd February 2019 : The SCR Workshop, Raipur, Chhattisgarh.**

The SCR Workshop was conducted for the 5th time in Chhattisgarh and this was a natural progression for the Raipur Homoeopathic Study Circle after being associated with the institute for more than 10 years and attending all our symposiums and seminars and conducting seminars in Raipur. This was a residential workshop and more than 80 delegates attended it. It had 50 practicing doctors from the area of Bilaspur, Raipur, Bastar, Durg. There were 30 interns from various colleges around Raipur. This in itself was a positive testimonial of the 4th ever workshop taken in February 2019. Case was presented by Dr. Mansi Barve. The workshop was conducted by Pune team : Dr. Pravin Bhalgat, Dr. Umesh Pore, & Dr. Mansi Barve. It was a unique experience for the team and the delegates from the Raipur group. The whole experience could touch all the relevant technical issues of the SCR as well as the life and living component of passion and costs of the same. This was a powerful experience for all including the office bearers of Raipur Homoeopathic Study Circle which moved a lot of them to tears as a result of significant introspection and insights. The scr was actually being used by quite a few for the first time. The workshop as a result was an experiment in trying to reach out the scr and the icr methodology to people who have not had formal training with the institute.

- **MARCH 2019:** A symposium of Materia Medica was held at Denanath Mangeshkar Hospital on 15th , 16th ,17th of March 2019. The theme was **ICR SYMPOSIUM ON HOMOEOPATHIC PRESCRIBING**. Studying The Qualitative Shades Of Sadness & Its Reflection on Differential world of Materia Medica. This theme was selected in memory of the sad demise of Dr. Prakash Chareja and the subsequent state of the Pune Group. The symposium was attended by 164 participants. The 12 cases focused on the Materia Medica through the study of the EET.
- The branch deeply mourned the loss of Dr. Prakash Chareja (MD, MICR,MBA) academic coordinator education Pune Branch on 8th August 2018 due to a cardiac arrest. He was associated with the branch for 26 long years in various capacities and will always be remembered for his helping and loving nature.
- Two of our consultants also visit Denanath Mangeshkar Hospital. A fully charitable clinic in association with Kripal Ashraam at Ghorpadi Peth, functions only on Sundays and sees around 200 patients every month.

THE CLINICAL SERVICES:

Clinical Patient Data 2018-19

Month	Follow ups	screening	New cases	Total
April 2018	316	0	6	322
May 2018	287	3	5	295
June 2018	319	5	12	336
July 2018	289	2	11	302
August 2018	273	4	5	282
September 2018	275	6	9	290
October 2018	271	3	4	278
November 2018	206	1	3	210
December 2018	155	3	4	162
January 2019	208	3	5	216
February 2019	223	5	7	235
March 2019	245	6	3	254

The total number of patients served in last year are approximately 3200.

URBAN CHARITABLE CLINICS ACTIVITIES 2018-19

The Trust's urban clinic charitable services have been serving the various strata of the population since its inception in 1984. This has been possible only because of our dedicated and sincere physicians who have been constantly striving to achieve our motto of promising 'Quality assurance in a cost effective way'.

Currently the services are available at 5 centres at, Deonar, Jogeshwari, and in Santacruz, Mahul, and Ghansoli in collaboration with like -minded organisations.

Patient Statistics for 2018-19

10.	Musculo- skeletal System	Osteoarthritis, Rheumatoid arthritis, Spondylitis (cervical, lumbar) , Sciatica
11.	Endocrine	Hypothyroidism
12.	Psychiatry	Anxiety disorders, Depression, Children with scholastic difficulties
13.	Eye	Stye
14.	Blood	Anaemia

ADDITIONAL SERVICES

CAMPS

We have conducted two camps in Deonar.

The first Camp was general health check- up, conducted on 27th August 2018 at Deonar clinic between 10 am to 2 pm.

The camp was attended by our team of doctors.

1. Dr. Sunil Bhalinge
2. Dr. Madhavi Tamboli
3. Dr. Leena Chopra
4. Dr. AtulWayal
5. Dr. Pradeep Dhole
6. Dr. Trupti Savla

The screening of about 70 patient was done. Majority of the patients had complains related to the MSS, RS, GIT, and Skin. The patients with chronic complaints were oriented for Homeopathic treatment. The patients having any acute complaints were treated for the same.

The second camp was conducted on 15th October 2018 at Deonargaon, between 10 am to 2 pm. It was also a general health check-up camp.

The camp was attended by the following doctors.

1. Dr. Madhavi Tamboli
2. Dr. Leena Chopra
3. Dr. Pradeep Dhole
4. Dr. Trupti Savla

Screening of about 105 patients was done. This camp was predominantly attended by children within the age group of 7-10 years. Majority of the patients had complaints related to MSS, RS and GIT. One case of muscular dystrophy was also seen.

The **Jogeshwari clinic** also saw the commencement of dental services, which are managed by the Malad Centre. The Dental clinic is functioning from 1st May 2019, under Dr. Shailendra Pathak and his team.

Timings of the dental clinic: Monday-Saturday: 9:00 am – 2:00 pm.

The residents and our patients are also taking benefit of the pathology services available at the Jogeshwari clinic since May 2017.

ICR Study Group Kolhapur

ICR study group Kolhapur works with concept of “Learning by sharing” since its origin at Kolhapur in 2001.

Academic Activities- We have been regularly conducting academic activities for practitioners and students who benefit in improving their knowledge, skills in standardized homoeopathic care based on ICR philosophy of Trico ordinate care.

1. SCR methodology case based workshops-,2 days once in 2 months for core group members attended by 8-12 regular participants.
2. This year we organized a 1 day Seminar in Oct 2018 on Homoeopathic management of Mood Disorders and Rheumatic Disorders attended by 500 delegates from Maharashtra
3. Student orientation programme for homoeopathic interns of SPES Homoeopathic Medical College attended by 35-40 students of final year BHMS
4. The local group conducts a weekly afternoon session on regular basis. This year as we have only 3 members residing in Kolhapur and rest visiting the workshops from distance the weekly sessions were not conducted. 5 members are the ICR Alumni from M.D Course, visiting from Satara, Pandharpur,Sangli.

Clinical Services –

1. Homoeopathic Charitable Clinical services are operational at Kuditre village which is 12 km from Kolhapur

since 11 June 2006 which is running now 2 days in a week.

2. Clinical services at Homoeopathic OPDs at Venutai Homoeopathic College, Kolhapur from 2016.

ICR Study Group Kolhapur had Organized a One-day Homoeopathic seminar -Learning by doing - Clinical application of homoeopathic philosophy, repertory & Materia medica at bedside the ICR way-in management of mood disorders & rheumatic disorders on Sunday 7th October 2018 at Keshavrao Bhosle Natyagruha, Khasbag Maidan, Kolhapur

The objective of Seminar was to demonstrate application of Homoeopathic Philosophy, Repertory, and Materia Medica through practice of Aphorisms 1 to 6.

Thanks to the effort of Team Kolhapur who canvassed for a month in all colleges in Kolhapur, Sangli, Satara, Jaysingpur, Belgaum, Dharwad, Vengurla. 500 delegates along with staff of all colleges attended the seminar.

Dr. Sudhir and Vilas compered the show.

Dr. Nikunj Jani -His command over language, diction and flow was commendable and could hold the attention of 500 people in his entire presentation. 5 cases of SSA focusing on approach to case taking, clinical diagnosis evaluation of symptoms, application in Repertory ,all 3 approaches of repertorisation , Materia medica (5 remedies) and posology general principles demonstrated. **Ajay and Avinash** complemented presentation with 1 case each of RA .

Dr. Sunita's presence was appreciable, her grit and commitment to work Inspite of loss of her mother 12 days ago. She had variety of cases from Neurotic to Psychotics and acute to chronic. Ajay's case of behavioral disorder of 2 sisters Puls and Lachesis well received. Avinash case of acute Psychotic episode of an old man –Lach with videos pre and post treatment was very effectively presented.

Dr. Manoj Patel was par excellent as Homoeopathic Psychiatrist. He mesmerized the group by his acting prowess. The importance of IPD, isolation, observations, interview techniques, handling family demonstrated.

CLINICAL SERVICES

1. **Venutai HMC** This was a an opportunity for us to practice what we have learnt in the standardised patient care in the SCR system and get access in the college and training of students. We had OPD on 4 days a week in morning attended by Physicians of ICR Study Group Kolhapur .40-50 patients per week patients visiting daily .But with no further cooperation of college management we have discontinued these services from June 2018
2. **Kuditre** Dr Avinash Patil and Dr Praveen Vadgave are the consultant at kuditre clinic. This year 21 new cases are defined, 7 cases are screened and total 490 follow ups are managed at Kuditre clinic. From this clinical service Dr Avinash is mastered in understanding of rural patient language and its conversion in materia medica. Three meetings with “bachat gat” was arranged this year to spread homoeopathy service in the community.

EMR Project Activity 2018-19

Project title: Efficacy of Homoeopathic intervention in influencing the academic outcome in children with academic difficulties from the vernacular medium-a multicentric study.

Background:

Dr. M. L. Dhawale Memorial Trust has been conducting a research project under the scheme of Extramural Research supported by the Ministry of AYUSH, Government of India. This project is a multicentric project and the centres are Palghar, Dahisar and Bengaluru.

The main objectives of the project is to identify children having scholastic difficulties and examine the extent to which they can improve their learning capacities by giving Homoeopathic medicines. The scholastic difficulties included are children having problems like Learning difficulties, slow learners and Attention deficient disorder and Hyperactivity (ADHD). These difficulties can be of severe category that can be missed out as child starts using some coping mechanism. All these categories have long term impact on the academic growth of child.

The project is under the guidance and head of Dr. Kumar M Dhawale; Principal Investigator and Dr. Prashant Tamboli; Co – Principal Investigator; Dr. Sunita Nikumbh- Consultant

The team working in this project are:

Research Fellows and doctors

1. Dr. Devangini Broker
2. Dr. Madhavi Tamboli
3. Dr. Kavita Jadhav
4. Dr. Mansi Surti
5. Dr. Latha Devarajan
6. Dr. Savitha
7. Dr. Anitha
8. Dr. Babitha
9. Dr. Nivedita
10. Dr. Anjum
11. Dr Rohina
MSW –
12. Ms. Sayali Narayankar
Clinical Psychologists
13. Ms. Pooja Ghadigaonkar
14. Ms Rucha Kulkarni
15. Mr. Johann Thomas
16. Mrs. Ashmi Shah
17. Mrs. Gayatri Kshirsagar
18. Ms. Maitreyi Redkar
19. Mrs. Mugdha Nene
20. Smt. Pavana Rao

Remedial Educators

21. Mrs. Maryam Katawala
22. Mrs. Vaidehi Palav
23. Smt Kavitha

Steps of research project:

The project started in the academic year 2017.

The project is planned in 5 Phases:

Phase I: Screening Process: Identifying the children

Phase II: Orientation Phase: Orientation of Parents and Teachers

Phase III: Enrolment Phase: Selecting the children for project

Phase IV: Intervention Phase: Homoeopathic treatment to enrolled children

Phase V: Final Analysis and Conclusion

Currently we are in Phase III and IV in this project.

In this phase children from 3rd to 6th std were screened for the scholastic difficulties as per standardized screening proforma.

1. Screening Phase I: Informal Assessment: The assessment was done by trained doctors and assessed their ability for copy writing, dictation, reading and comprehension, mathematics and vision laterality with the help of complex diagram
2. Screening Phase II: It involved short – listing the children who require further evaluation for diagnosis of scholastic difficulties. This was done by informal assessment by trained Homoeopathic physicians.
3. Orientation Phase I: Orientation of Parents about the project and screening process. Consent from parents and assent from children for further non – invasive examination such as IQ assessment, etc.
Orientation Phase II: Orientation of teachers about the scholastic difficulties and behavioural issues of Children
4. Screening Phase III: Trained Homoeopathic physician will take the clinical and behavioural history from the teachers and parents who had given consent using the standardized scale CBCL short version scale and ADHD scale to identify the behavioural issues
5. Screening Phase IV: IQ Assessment by trained clinical psychologist at school set up.
6. Screening Phase V: Ophthalmology (Eye check – up), ENT – Audiometry (Hearing check – up) and Paediatric check up at school set up
7. Screening Phase VI: Confirming the diagnosis by trained remedial educator
8. Final Enrolment of the Sample

Apart from this, we are doing physical screening of standards – 5th to 8th std. So far the general physical check up we have finished – ophthalmic check up is going on.

Total children were 1366. We have finished 1316 with the physical check up and approx. 140 children ophthalmic check up has been done.

Work done till 2019

Sr. no.	Item	
1.	No. of Schools enrolled	7
2.	No. of Children Screened	2846
3.	No. of Children Screened positive	718

POSTGRADUATE ACADEMIC ACTIVITIES 2018-19

- MLDMHI admitted 33 students for the Postgraduate MD Homoeopathy course for the batch of June 2018-2021.
- Results of MUHS MD (Hom) in the academic year 2018-19 is as follows –
 - a) In Summer 2018 MD I examination 29 residents out of 31 cleared the examination.
 - b) In Winter 2018 MD II examination all the residents cleared the examination.
- As a part of curriculum and to generate the interest and develop research aptitude in PG aspirants a workshop was organised for MD I batch 2016-19 was organised from 4th to 6th May 2018 and on 25th July to 27th July 2019 (for batch 2017-20)
- Environmental Day was observed on 5th June 2018 by cultivating 66 plants in RHH campus by MLDMHI faculty and RHH staff.
- International Yoga day was celebrated at RHH on 21st June 2018. A team of instructors from Institute of Yoga, Kelve instructed Yoga and its importance to PG residents, MLDMHI faculty and non teaching staff.
- “Resident as teacher” workshop was conducted for residents of batch 2018-21 from 25th July to 27th July 2018. It was an initiative to develop teaching qualities in residents.
- Independence day 2018 was celebrated by flag hoisting followed by an environment awareness program for faculty and PG residents “Care of Environment – Role of knowing and nurturing trees on 15th August. Pg students identified important plants on the campus and indicated their medicinal and non medicinal uses. Shri Sudhir Dandekar, Member of the Patient care Committee was the Chief guest.
- Republic day was celebrated by flag hoisting followed by competition among PG residents on topic “Remedy profile presentation / Remedy dramatization” on 26th January 2019. This was judged by Mr Kiran Thorat, Sports Incharge (Krida Sanchalak) Sonopant Dandekar Mahavidyalaya. Residents of MD II batch 2016-19 won the competition. Winning team comprised of Drs Nishigandha Mahajan, Chetan Herle, Neha Shendre, Devyani Deshmukh, Rashmita Petkar and Shradha Shendre.
- A competition for Magazine title was conducted on 12-2-19. Most of PG residents participated and exhibited their artistic cult. The students magazine committee comprising of Drs Shradha Shendra, Jigar Gori, Irshad Sayyed, Amina Asanar, Nayan Supekar, Vivek Vasoya, Aprana Nair, Nishigandha Mahajan, Chaitanya Chiplunkar under the guidance of Dr Bhavik Parekh and Dr Devangini Broker worked hard to produce an e-Magazine, the first time in the Institute
- Cultural and art event *Euphoria* was organised by cultural committee between 11 Feb -16th Feb 2019. Euphoria, an annual cultural event, was celebrated on 25th Feb 2019, in which almost all PG residents and

non teaching staff and RHH staff participated and showed their extracurricular talents in various arts sports and cultural events

- Woman's Day was celebrated on 8th March 2019 by arranging speech on Topic – "Role of female in my life". It was a joint exercise ran by RHH and MDMHI. Dr Devyani Deshmukh won the 1st prize, Dr Sneha Kharate 2nd prize and Drs Bharat raj and Saloni Mehta shared the 3rd prize.
- Institution was inspected by MUHS inspectors on the basis of Impact assessment which institute passed through without a hitch. Institute also stood successful for CCH standards evaluated by CCH inspectors in 2018.
- Beacon's competition of acute case presentation was conducted in the month of March 2018. Dr Deepali Phadtare (MD II Psychiatry resident) won the 1st prize. Dr Ramesh (MO) of MLD trust's Bhopoli centre won the 2nd prize and Dr Karishma Chhabda (MD part II Psychiatry resident) succeeded to grab the consolation prize.
- Dr Devyani Deshmukh and Dr Sonal Jagtap won the prizes in inter college poster competition at Dr D Y Patil Homoeopathic Medical college.
- On 16th March 2019, in Research conclave, inter college competition was conducted at Bharti Vidyapith, Pune in which Dr Jagruti Rite (MD II Medicine resident) won the 1st prize in poster presentation and Dr Devyani Deshmukh won 1st prize in oral presentation.

Sachin Junagade
Vice Principal

HAHNEMANN DAY 2018 was celebrated on Sunday, the 8th April 2018, at Auditorium, Rural Homoeopathic Hospital, Palghar. **“Music And Homoeopathy: Exploring Synergies In The Healing Of Ourselves And Our Patients”** and total 60 peoples attended this programme. Dr. Sharad Shah & Team were the speakers in this program.

ICR Day & Founder’s Day on 15th July 2018 at Auditorium, Rural Homoeopathic Hospital, Palghar. On **“Role of the Sustainable Trinity (Communities + Physicians +Science) In Tackling Pervasive Malnutrition (But How/ what About Nutrition ?)”** Presentation: RHS Team, Dr. Sujata Goda, Dr. Neena Ambekar, Dr. Sujit Swami, Dr. Ramesh Mamidala, Dr. Devangini Broker, Dr. Prashant Tamboli. Total 100 people attended this program

ICR SYMPOSIUM – Vadodara on 28th, 29th & 30th Sept 2018 on **“Homoeopathic Management of Epileptoid Disorders”**. Smt. Malini Kishore Sanghvi Homoeopathic Medical College, Karjan. Venue at ‘Anjoy –The Retreat’, 85/A, Sampatrao Colony, Opp. Chhappan Bhog, Off B P C road, Vadodara, Gujarat, India. Total 180 peoples were attended this program.
